# ABOUT US

Welcome to **AR Group of education**, a renowned educational consultancy dedicated to providing comprehensive guidance to students seeking undergraduate and postgraduate courses in India and abroad. With years of industry experience we understand the challenges students face in the admission process and aim to offer personalized solutions.

We prioritize the individual needs and aspirations of our students. Unlike admission counselors who prioritize their own interests, we believe in presenting the real scenario and providing factual information. Our organization was founded with the vision to offer genuine guidance and help students make informed decisions about their educational journey.

## NEET-UG

The National Testing Agency (NTA) conducted the **NATIONAL ELIGIBILITY CUM ENTRANCE TEST (UG) 2023 (NEET(UG)-2023)** for admissions to MBBS/BDS courses and other undergraduate medical courses in approved/recognized Medical/Dental and other colleges/institutes in India. Therefore, admission to the MBBS course in AIIMS, New Delhi, as all government and private colleges, will be based on NEET scores

## NEXT

The **NATIONAL EXIT TEST (NEXT)** is a comprehensive examination conducted after the final year of undergraduate or MBBS studies. Its purpose is to assess the competence of medical graduates and allow them to continue practicing medicine in India. Additionally, the NEXT. The introduction of the NEXT exam was stipulated in the National Medical Commission Bill, which was successfully passed in 2019. The inaugural NEXT exam is scheduled to take place in December 2023.

## MBBS INDIA

- The medical course in India has a duration of 5.5 years, which includes a mandatory 1-year internship program
- In the classroom setting, the student-teacher ratio is maintained at 1:26

## MBBS ABROAD

- The medical course in foreign universities typically has a duration of 6 years including a mandatory 1-year internship program.
- With a ratio of 1:12, students receive more personalized attention and guidance from their professors.

## Facts or Scenario

"The journey to becoming a doctor typically takes many years of education and training undergraduate studies to medical school, residency, and potential fellowships, it can take a minimum of 10 to 15 years to become a fully licensed physician"

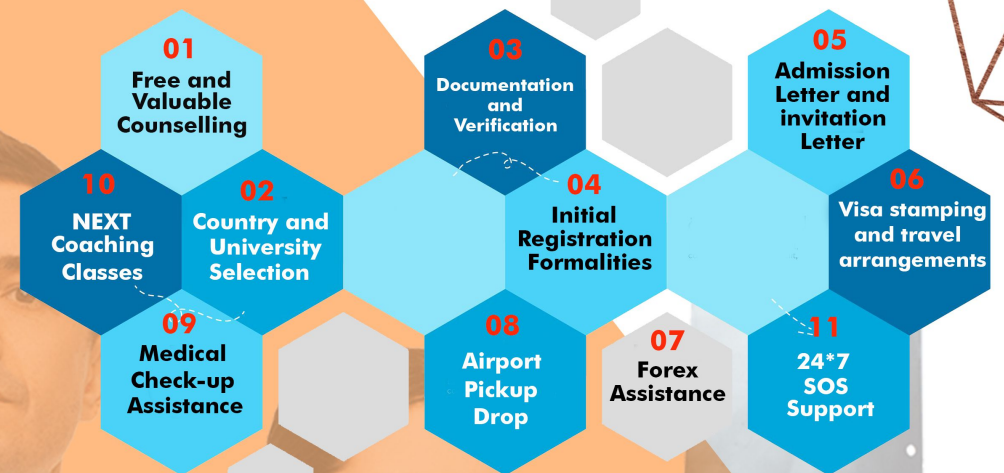

Despite having the highest number of medical colleges in the world, India faces a significant challenge of limited seat availability, with some colleges admitting only hundred students per batch. This infrastructure issue poses a major hurdle for both aspiring students and the nation as a whole. Unfortunately, this problem remains unresolved and shows no signs of immediate resolution. To meet the demands of students pursuing medical studies and nurture potential future doctors, a change is needed. The introduction of new private colleges was meant to address this issue but instead resulted in the establishment of privately funded medical institutions by business people and politicians.

However, the lack of experience and unreliable practices in running these medical colleges has led to the commercialization of medical education, prioritizing profits over skill of the development and the preparation of competent doctors. Instead of increasing opportunities and facilities for medical aspirants, the privatization of medical education has created barriers, making it difficult for deserving students to pursue their dream of becoming a doctor.

In such a scenario, where the prices of private medical education in India are skyrocketing and the availability of seats in government institutions is limited, pursuing an MBBS degree from abroad has emerged as one of the best options for medical aspirants. We not only assist students in gaining admission to universities overseas but also provide continuous support and guidance throughout. Our aim is not just to enroll students in a medical university but to be their companions, offering warm-hearted assistance until they are successfully admitted to their chosen medical institution.

For a spot in an Indian government medical college to study for the MBBS, lakhs of Indian students take the NEET exam each year. Only 5% of applicants to India's medical government institution are given the chance to study MBBS due to the intense competition.

## OUR SERVICES

## Eligibility Criteria

- ◎The student must have passed the higher secondary examination or ISE equivalent to 10+2 Higher Secondary Exam.
- ◎A minimum of 50% in Physics, Chemistry and Biology is required (40% for Reserved Category).
